CAREER OBJECTIVE

BCA graduate with hands-on experience in Python-based backend development, database management, and IoT project work. Seeking an entry-level software development role to apply programming and problem-solving skills, contribute to real-world projects, and grow within a professional engineering team.

EDUCATION

Bachelor of Computer Applications (BCA) **2023-2026**

St. Joseph's College for Women, Tirupur (Bharathiar University)

TECHNICAL SKILLS

- Programming Languages: Python, Java, C, C++, SQL
- Web Technologies: HTML5, CSS3, JavaScript
- Frameworks & Libraries: React.js (Learning), Node.js (Learning)
- Full Stack Development: MERN Stack (Learning)
- Database: MySQL
- Version Control: Git, GitHub
- Cloud & DevOps: AWS (Learning), Docker (Learning), Kubernetes (Learning), DevOps (Learning)
- Software Development: Object-Oriented Programming (OOP), Data Structures & Algorithms, REST APIs, Software Development Life Cycle (SDLC), Database Management Systems (DBMS)
- IoT & Embedded Systems: NodeMCU (ESP8266), Arduino IDE, Embedded Systems, IoT Development
- Operating Systems: Linux, Windows
- Networking: Computer Networks, TCP/IP
- Tools: Visual Studio Code, Eclipse IDE, Microsoft Office Suite

INTERNSHIP / TRAINING

Nobel Software Solutions, Tirupur | Full Stack Development Trainee *May 2026 – Present*

- Currently undergoing Full Stack Development training with hands-on experience in modern web technologies.
- Developing skills in HTML, CSS, JavaScript, React.js, Node.js, Express.js, MySQL, JSON, REST APIs, and Git.
- Gaining practical knowledge of front-end and back-end development, database management, API integration, and web application deployment.
- Working on real-world projects to build responsive, scalable, and database-driven web applications using industry-standard tools and development practices.

Nobel Software Solutions, Tirupur | Python Stack Development Intern *May 2025 – July 2025*

- Completed a hands-on Python Stack Development internship, focusing on server-side scripting, REST API development, and database integration.

NOWFIYA JESHMI A

BCA Graduate | Aspiring Software Developer

Tamil Nadu, India | nowfiyajeshmi@gmail.com | +91 63802 96414

LinkedIn Profile | Github Profile | Portfolio

- Developed and tested REST API modules for product listing, cart management, and order processing for an e-commerce application.
- Worked with MySQL for database schema design and data management, and used Git/GitHub for version control.
- Gained practical exposure to SDLC, debugging, API testing, and backend development through mentor-guided project work.

PROJECTS

Automatic Irrigation System Using Rain Sensor and Soil Moisture Sensor ***December 2025 – March 2026***

- Developed an IoT-based system to automate plant irrigation based on soil moisture levels.
- Integrated soil moisture and rain sensors with a NodeMCU microcontroller.
- Used a relay module to control the water pump, reducing water wastage and preventing over-irrigation.

Technologies: NodeMCU| IoT| Sensors| Blynk

Laser Beam Security Grid ***December 2025 – March 2026***

- Built REST APIs to support core ecommerce functions such as product listing, cart, and order management.
- Developed an IoT-based security system for real-time intrusion detection.
- Integrated Laser, LDR sensor, and NodeMCU (ESP8266) to detect beam interruptions.
- Programmed using Arduino IDE to trigger a buzzer during unauthorized access.
- Implemented Wi-Fi connectivity for remote monitoring.
- Applied IoT and embedded systems concepts to build a cost-effective security solution.

Technologies: IoT| NodeMCU (ESP8266)| Arduino IDE| LDR Sensor| Embedded Systems| Wi-Fi

Lease Management System | Salesforce CRM ***June 2025 – October 2025***

- Developed a Salesforce-based Lease Management System to streamline property leasing operations, including tenant management, lease agreements, payment tracking, and automated communication.
- Implemented Salesforce Flows, Validation Rules, Approval Processes, Apex Triggers, and Scheduled Apex to automate business processes and improve data accuracy.
- Built custom objects for Property, Tenant, Lease, and Payment while integrating email notifications and workflow automation to enhance operational efficiency.

Technologies: Salesforce CRM| Apex| SOQL| Lightning App Builder| Salesforce Flow| Validation Rules| Approval Process| Scheduled Apex

Elite Exhaust Care – LPG Leakage and Smoke Detection Safety System

- Developed an IoT-based kitchen safety monitoring system to detect LPG gas leakage, smoke, fire, and abnormal temperature levels in real time.

LinkedIn Profile | Github Profile | Portfolio

- Integrated MQ-2 gas, flame, and temperature sensors with an ESP8266 to continuously monitor hazardous conditions.
- Implemented buzzer alerts and Wi-Fi-based notifications to provide immediate warnings during emergency situations.
- Enabled real-time remote monitoring through Blynk and Firebase, supporting faster response and improved household safety.

Technologies: ESP8266 |Embedded C |Micro Python| MQ-2 Gas Sensor| Flame Sensor| Temperature Sensor| Buzzer| Wi-Fi| Blynk| Firebase| Arduino IDE

Guardian Care Autonomous Safety Network – IoT

- Developed an IoT-based security system for automated monitoring of restricted areas.
- Integrated PIR and HC-SR04 ultrasonic sensors to detect motion and measure distance in real time.
- Used NodeMCU (ESP8266) for sensor data processing and Wi-Fi connectivity.
- Implemented buzzer and LED alerts for immediate notification during detected intrusions.
- Designed the system for automated, real-time safety monitoring with reliable sensor-based detection.

Technologies: IoT | Embedded Systems | NodeMCU (ESP8266) | PIR Sensor | HC-SR04 Ultrasonic Sensor | Buzzer | LED | Wi-Fi | Arduino IDE

Mp3 Tag Reader And Editor ***July 2025 – August 2026***

- Developed a command-line MP3 Tag Reader and Editor application to read, display, and modify ID3 metadata in MP3 files.
- Implemented features to view metadata including song title, artist, album, year, track number, and genre.
- Enabled users to edit selected metadata fields through command-line arguments.
- Utilized binary file handling and pointer operations to modify metadata while preserving the remaining MP3 data.
- Applied structured programming concepts including structures, string handling, bitwise operations, and file handling.

Technologies: Advanced C Programming | Structures | File Handling | Pointers | String Handling | Bitwise Operations | Command-Line Arguments | ID3 Metadata | Binary File Handling

Image Steganography Using LSB Encoding & Decoding ***May 2025 – June 2026***

- Developed an image steganography application to securely hide and retrieve text messages within BMP image files using the Least Significant Bit (LSB) technique.
- Implemented efficient encoding and decoding mechanisms to embed secret data while preserving the visual quality and integrity of the original image.
- Handled BMP file structures, image headers, and binary data for accurate message embedding and extraction.
- Applied bitwise operations, pointers, structures, and modular programming to implement the steganography process.

LinkedIn Profile | Github Profile | Portfolio

- Gained practical experience in file handling, debugging, and command-line application development using C.

Technologies: Advanced C Programming | File Handling | Bitwise Operations | Pointers | Structures | Functions | Command-Line Arguments | BMP File Handling

Ecommerce API Development ***May 2025 – July 2025***

- Built REST APIs to support core ecommerce functions such as product listing, cart, and order management.
- Applied Python-based backend development practices as part of hands-on internship training.

Technologies: Python | REST API | Backend Development | API Development | JSON | HTTP Methods | Data Handling

CORE COMPETENCIES

- IoT & Embedded Systems
- Problem Solving
- Team Collaboration
- Time Management
- Software Testing & Debugging
- Analytical Thinking
- Communication Skills
- Adaptability & Continuous Learning

LANGUAGES

English • Tamil

CERTIFICATIONS

Introduction to Kubernetes — Simplilearn | Completed on 3 October 2026

ACHIEVEMENTS

Presented a research paper on "Cyber Security" at the 2nd International Conference on Recent Trends in Multi-Disciplinary Research and Innovation (ICRTMRI'25), held at A.V.P. College of Arts and Science, Tirupur – September 2025.
